Profile:

Senior .NET Software Engineer with over 10 years of experience in backend systems, microservices architecture, fintech and enterprise software development. Strong advocate of clean code, test automation, and modern development practices. Skilled in full-stack .NET technologies, including Angular for frontend development, and cloud-native solutions. Customer-focused with a proactive, can-do attitude.

Work Experience:

09.2023 – now | **Senior .NET Software Engineer** | **Duett AS** | Warsaw

Development and maintenance of Duett Økonomi accounting software targeting small and medium-sized businesses. I was one of the early hires in the Warsaw office and had a chance to be a part of architectural decisions and drive migration of monolith multi-tenant .net 4.7 + asp.net MVC 5 based system to dockerized microservices on .net 8.0 + Angular frontend. I've been striving to maintain good test coverage by introducing integration tests running against a full MS SQL database and end to end tests based on the playwright framework.

Technologies: Microservices, C#, ASP.NET Core, MS SQL with EF, REST apis, RabbitMQ, Redis, Angular, Kendo UI, Playwright, DbUp, Respawn

---

07.2021 – 08.2023 | **Senior Software Engineer** | **Point72 Asset Management** | Warsaw

Development and maintenance of the proprietary platform for analysts and portfolio managers focused primarily around market research, ideas and conviction sharing and other day to day activities of investment professionals.

Technologies: Microservices, C#, ASP.NET Core, MongoDB, Elasticsearch, MS SQL with EF, REST apis, involved in the migration of services from .net 4.7.2 to .net 5

02.2020 – 06.2021 | **Senior Software Engineer** | **Goldman Sachs** | Warsaw

Part of the team which was responsible for either demising or up-lifting/rewriting legacy platforms.

Technologies: Mostly proprietary platforms using different technology stacks depending on the project e.g. C# Winforms, React, Java Spring, proprietary scripting language

---

03.2018 – 01.2020 | **Senior .NET Developer** | **Sticos** | Warsaw *(part of the team in Trondheim, Norway)*

Created a new version of one of core Sticos' products which targets the accountancy sector in Norway. Working in an international environment using an agile approach and having close contact with business people to come up with the best solutions.

Technologies: Microservices, C#, ASP.NET Core, MS SQL with EF, Angular 5

03.2017 – 02.2018 | **Senior .NET Developer** | **mBank S.A.** | Warsaw

Development and maintenance of various systems supporting internal banking processes. Mostly working on transition of custom CRM system from desktop to web application with new features and adjustments. Delivering

solutions that can handle large sets of data, are possible to scale and meet security requirements of the banking sector.

Technologies: Microservices, C#, MS SQL, Redis, ASP.NET Web API, Angular 2

08.2016 – 02.2017 | **.NET Developer** | **SoftwareONE** | Warsaw

Contributed to the microservices-based enterprise software and cloud procurement platform.

Technologies: Microservices, C#, ASP.NET Core 1.0 (targeting .NET 4.6), EF Core, Angular 2

03.2016 – 07.2016 | **.NET Developer** | **ITMAGINATION** | Warsaw

Working on a project for a client in the financial sector.

Technologies: C#, ASP.NET MVC, DI, WCF, MS SQL Server, NHibernate, FluentMigrator, NServiceBus, Quartz.NET

09.2015 – 02.2016 | **.NET Developer** | **Qualent Software Ltd.** | Warsaw

Developing solutions for the biggest Polish companies including leaders of the insurance and telecommunication industry.

Technologies: C#, ASP.NET MVC, ASP.NET Web API, StructureMap, Windows services, MS SQL Server, Entity Framework, AngularJS, MassTransit

---

08.2012 – 08.2015 | **associate software engineer** | **Symantec** | Warsaw

Continuing my previous project in Symantec. During development we transitioned to ASP.NET MVC 5 and Twitter Bootstrap framework. I started to do more and more crucial changes in the backend as well.

05.2012 – 07.2012 | **student–intern** | **Symantec** | Warsaw

To my responsibilities was developing the company internal portal for static code analysis which helps finding globalization and internationalization bugs. Technologies which were used are ASP.NET MVC 3 Razor with HTML, CSS, JavaScript and MS SQL database and Perforce code repository. I was doing mostly the front-end.
